

*Europe Code Week is a grassroots initiative which aims to bring coding and digital literacy to everybody in a fun and engaging way.*

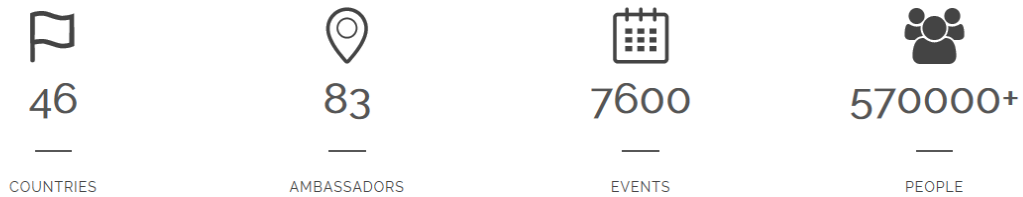

*Today we live in a world that has been affected by rapid advances in technology. The way we work, communicate, shop and think has changed dramatically. In order to cope with these rapid changes and to make sense of the world around us, we need to not only develop our understanding of how technology works, but also develop skills and capabilities, that will help us to adapt to living in this new era.*

*Learning to code helps us to make sense of how things work, explore ideas and make things, for both work and play. What's more it helps us to unleash our creativity and work collaboratively with wonderful people both near us and all over the world.*

Partners and Sponsors of the CodeWeek

Our school received a certificate  
as the only technical school in Tychy this year

211 events from Poland
